

THE XL COMBER

Productivity booster: **The TCO 21XL**

The new Trützschler heavy-duty comber maximizes productivity by 50% and saves 25% space – without compromising quality. It delivers consistent, superior sliver quality on 12 heads thanks to Trützschler's torsion-resistant design with DUAL DRIVE and 2TWIN DRIVE. Operating 12 instead of 8 heads reduces energy

consumption by 10% per head, which minimizes conversion costs per kilogram. ONLINE NOIL MONITORING solves a major challenge for combing and shows noil changes online.
